## 1. RocketTXT Essential Information

### 1.1 Writing Your Message

Due to the limited variation on how your message is presented, it is important that your grammar and use of CAPS is effective. Use CAPS to highlight your store suburb or point that you are trying to convey. You only have 160 characters and the software will prevent you from exceeding this. Use abbreviations such as 'pls' for 'please', '@' for 'at' '&' for 'and' etc. Try to avoid using text slang as it is unprofessional and many customers will not understand the message that you are trying to convey. When typing phone numbers DON'T leave gaps...most mobiles will identify a number and give the recipient the opportunity to respond to you in 1-2 key strokes. Double and triple check your content before any send.

### 1.2 Privacy Information

It is vitally important that you maintain and grow the integrity of this medium. It is therefore suggested that you adhere to some very basic principles. The Store membership forms DO cover the legalities of communicating to your customers both via SMS and e-mail. Although this is the case, it is highly likely that your customers are unaware of this, so it's wise to stick to a couple of very basic privacy principles.

### 1.3 Overdue and other Reminders

The fact that the reminder message is directly related to a transaction that was conducted between your customer and your store, there are no canvassing or permission issues. You do not need to include "opt-out" features within your message or ask for permission to send operational reminders, however you must identify your store and include a phone number

### 1.4 Promotional Call to Action Messages

When you are targeting your own database with any marketing or similar campaign, you must give your customers the opportunity to "opt out". By clearly conveying this in your message, along with a relevant number or automated function allowing your customer to be excluded from any future SMS campaigns, will keep you safely within the privacy parameters. You must always include your store name and phone number.

### 1.5 Your Customer Data

You control your customer data at all times. Your data is not stored on any external servers or similar storage facilities.

### 1.6 Database Clean up Routine

It is recommended that you run the Member Database Clean up Routine on a regular basis. Refer to the link in the 'Resources' section of RocketTXT for instructions and further details

### 1.7 About punctuation

Please note that any variation to your member's data in Rocket, will effect RocketTXT ability to collate information for an SMS send eg punctuations such as commas, full stops, dashes etc.

### 2. What makes a successful RocketTXT Campaign?

The beauty of RocketTXT is that you are able to both respond to market pressures (competitor price points) and to proactively drive marketing campaigns easily and cost effectively. Forget about taking weeks to get those flyers printed, and allowing your competition to impact on your revenue - ACT NOW! RocketTXT is an effective time and place marketing tool. Campaigns that used to take weeks can be derived and executed within hours.

With any campaign, it is important that you think about what you are trying to achieve – to have a clear objective and to be able (if possible) to measure the effectiveness. Below are some pointers to take on board before executing a campaign:

1. Identify the objective of the campaign – is it a message to reinforce Brand Awareness or does it contain a definitive call to action or offer? This will determine the structure of your message.
2. If it's an offer designed to attract traffic to the store, ensure that the offer is strong enough to entice! 50c off your usual price point may not be tempting enough!
3. Structure your message so that it is eye catching (you can use UPPER and lower case to create impact!).
4. Try to simplify the message – do not put too much information in the message as it can appear confusing – multi offers can become diluted.
5. Think about who you are targeting. It is important to consider delinquent customers etc
6. The time frame for the offer needs to be considered. People need ample warning and ability to take advantage of offers. If the offer is for a specific day only, please ensure that the message is sent the day before or early in the day. Most offers are best used over a period of days.
7. If the campaign has a "call to action" use the hints in this manual to measure the effectiveness. Only then can you determine what works and what doesn't work.

### 3. Example SMS Messages

When designing SMS messages please note that all messages, except late list messages, MUST have an OPT OUT clause under privacy legislation. Also messages cannot be over 160 characters.

<b>Late List</b>	Dear <First Name>, you have <item count> rental items outstanding. Please return to [Store] _____ asap or call 96981234 to discuss

**6. Late List Guide**

**6.1 Why use RocketTXT for the late list?**

Managing your late list can be a time consuming and costly exercise. Many Store staff members have also expressed a general dislike for the task, as customers are not always receptive to phone calls of this nature. The introduction of RocketTXT can significantly reduce time and money, and also alleviate the stress of having to speak directly with customers with this type of message. SMS allows you to contact customers at any time – not just between 6-8pm at night.

The sections below will provide you with a detailed overview on how to run your reports and manage your overdue:

**6.2 Overdues Report**

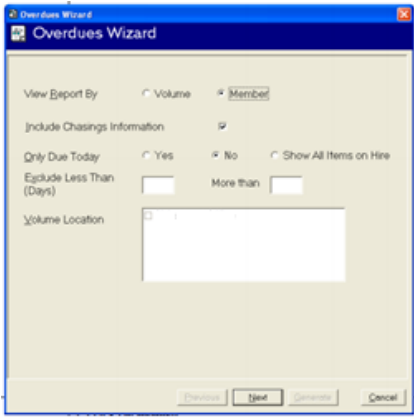

1. Overdues Report (Late List – 2 Days & Over)	
<b>Print this report to:</b>	<ul style="list-style-type: none"> <li>o Check the shelves for any product that was put back without being return scanned first</li> <li>o Once you make any adjustments, go on to "Chasings" and telephone members for late items</li> </ul>
